PROFILE

Flutter developer with 4+ years building and shipping production mobile apps to the App Store and Google Play, with 20K+ combined downloads. Specialized in cross-platform Flutter development with native iOS integration via platform channels and Swift/SwiftUI. Experienced across the full lifecycle – architecture, REST API integration, monetization, testing, and store deployment – including OpenAI API integration and AI-assisted development workflows. Owned apps end to end from concept through release, updates, and store management. Contributed to startups Mandible (AI-powered dental platform) and Müüd (school well-being platform) alongside building consumer apps through Svelte Solutions.

PROFESSIONAL EXPERIENCE

Software Engineer - Mobile

2025 – Present

Svelte Solutions 

Pakistan

- Built and shipped multiple cross-platform apps to the App Store and Google Play from concept to release, owning architecture, integration, testing, deployment, and maintenance.
- Developed native iOS functionality and platform-specific features using Swift/SwiftUI and Flutter platform channels.
- Architected apps using a repository/services pattern with Riverpod, separating data, controllers, and views for testable, scalable code.
- Integrated REST APIs and backend services for real-time data and app functionality.
- Implemented subscription monetization with RevenueCat and hybrid free/premium models with AdMob.
- Integrated Firebase Crashlytics, Analytics, Authentication, and Cloud Messaging for reliability and engagement.
- Automated deployment with Fastlane; wrote unit tests; used Git for version control throughout.
- Managed full store presence, listings, screenshots, privacy policies, terms, App Review rejections, and release updates.
